- **March 2010 – Dentistry and Prescription Opioid Abuse**

Prescription opioid abuse: Payer issues

- Poor quality of care
 - Drug abuse
 - Pain management
- Work-related consequences
- Costs of care
- Legal liability
- Paying for drugs ingested non-medically

Payer opportunities

- Prescriber training
- Patient training
- Formulary policies
- Case management
- Prevention within pain management practice
- Prescription monitoring

Meeting Objectives

- To review the impact of prescription opioid fraud and abuse on health care payers, other payers, and their customers
- To understand payers' perspectives on these issues, and clarify facilitating factors and obstacles in payers proactively addressing these problems
- To review current knowledge about the effectiveness of payer-based approaches to addressing Rx opioid abuse
- To develop recommendations for payer-based approaches to Rx opioid abuse

Meeting Deliverables

- Best practices for health insurers in preventing and managing prescription opioid fraud and abuse (Breakout 1)
- Optimizing clinical care to prevent and treat Rx opioid abuse (Breakout 2)
- Impact of prescription opioid abuse on broad family of payers (Breakout 3)

Housekeeping Notes

- Restrooms in the back
- Your packets
- Fill out your evaluations
- Thumb drives tomorrow
- Turn on/off your microphone
- Lunch in lobby...staff will direct you
- Have fun

Thanks!!!
